E-COMMERCE

## Key Features

**AI Health Consultations** - Chat with our AI health agent for personalized longevity advice and supplement recommendations.

**Supplement Marketplace** - Curated selection of longevity-focused supplements with direct checkout.

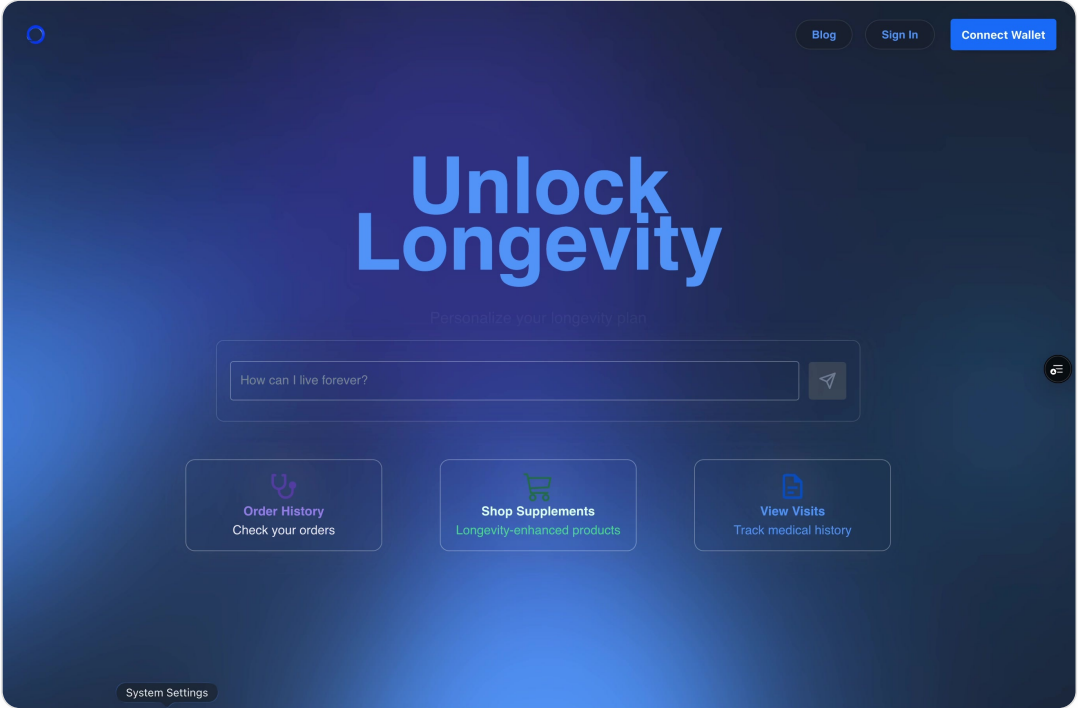

**Telehealth Integration** - Book and track doctor visits with full medical history.

**Rewards System** - Earn and track rewards through platform engagement.

# Product Demos

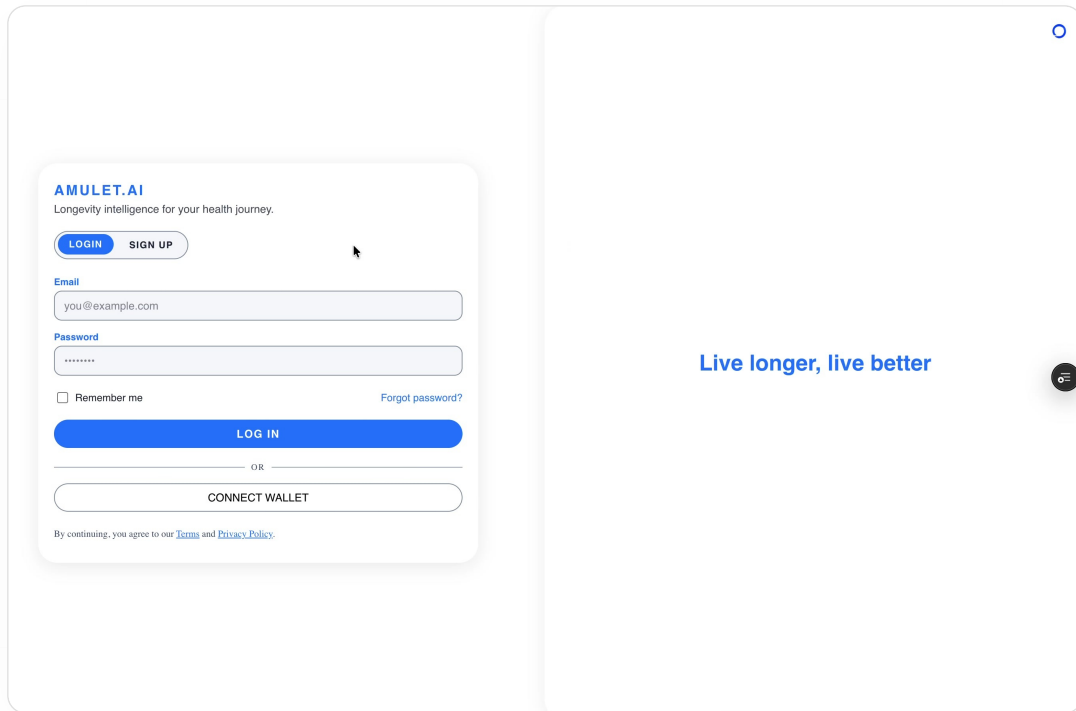

## LANDING EXPERIENCE

### Landing Page

A modern, conversion-optimized landing page that introduces users to the Amulet platform. Features a clean hero section with clear value proposition, interactive demo of the AI chat functionality, and seamless onboarding flow. Users can connect their wallet or sign up with email to get started.

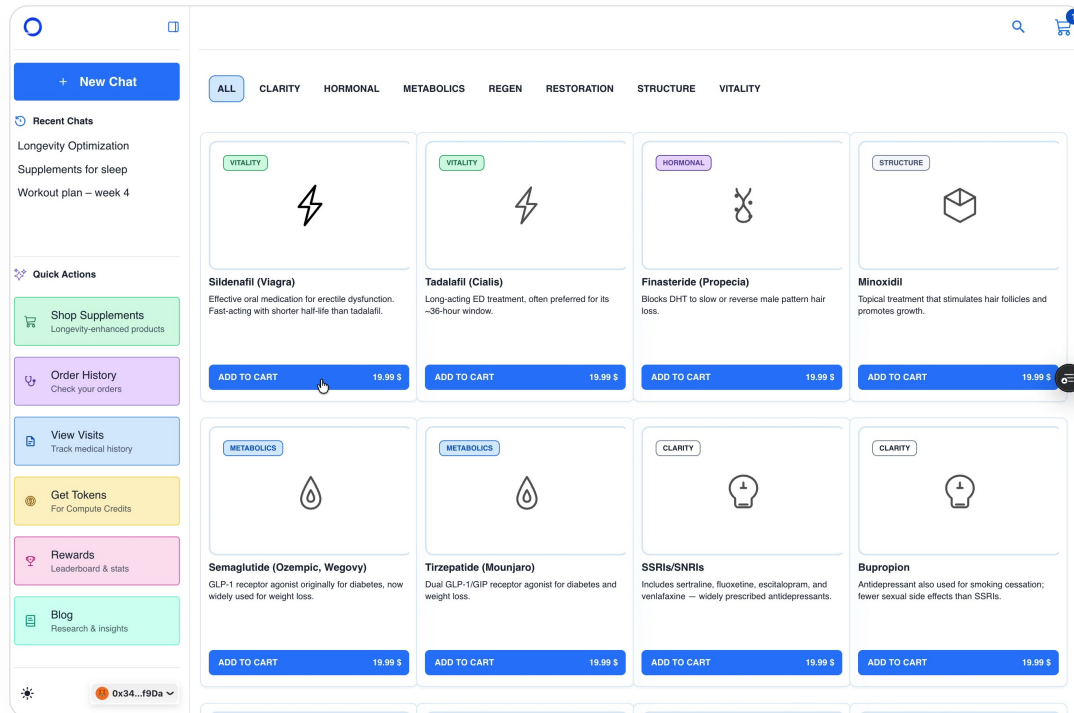

## Multi-Auth Login System

The image shows a UI mockup for a 'Multi-Auth Login System'. It features a light gray background with a white login card on the left and a large white area on the right. The login card, titled 'AMULET.AI' with the tagline 'Longevity intelligence for your health journey.', includes 'LOGIN' and 'SIGN UP' buttons. It has input fields for 'Email' (containing 'you@example.com') and 'Password' (masked with dots). Below these are a 'Remember me' checkbox and a 'Forgot password?' link. A prominent blue 'LOG IN' button is centered, followed by an 'OR' separator and a 'CONNECT WALLET' button. At the bottom of the card, a line of text states: 'By continuing, you agree to our [Terms](#) and [Privacy Policy](#).' The right side of the mockup contains the slogan 'Live longer, live better' in blue text. A small blue circle is in the top right corner, and a dark gray circle with a white icon is in the bottom right corner.

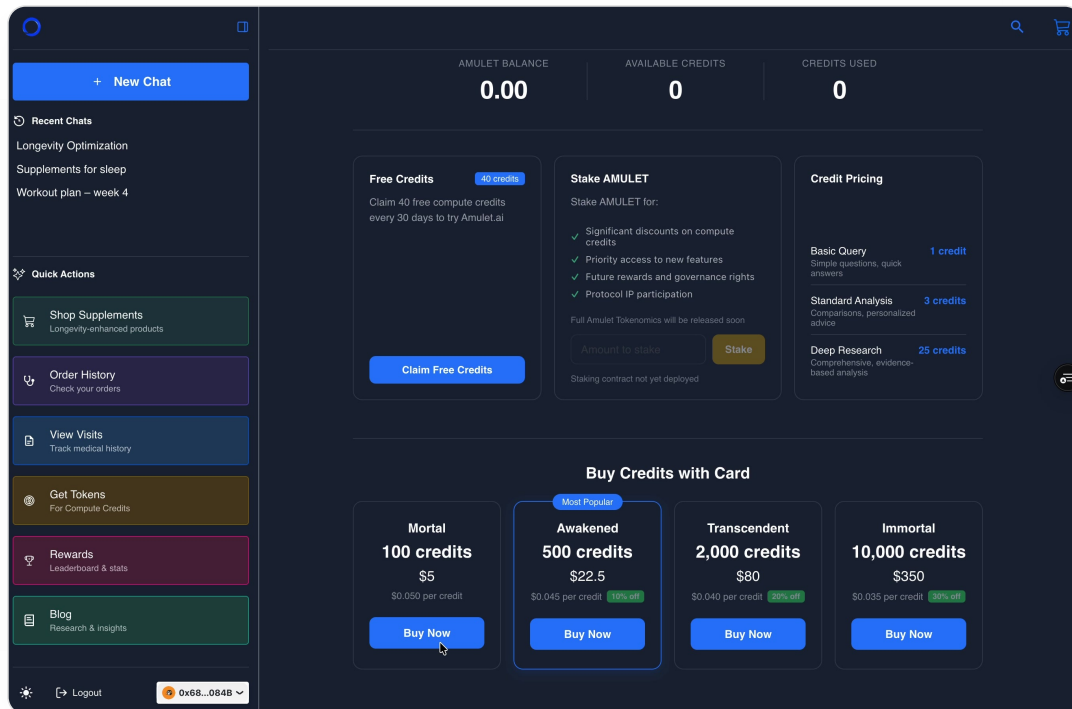

Flexible authentication supporting both traditional email/password login and Web3 wallet connection via RainbowKit. Users can choose their preferred authentication method, with seamless session management and secure token handling. Supports multiple wallet providers including MetaMask, Coinbase Wallet, and WalletConnect.

# Supplement Marketplace

A curated catalog of longevity-focused supplements with detailed product information, pricing, and direct add-to-cart functionality. Products are organized by category (cognitive, sleep, energy, etc.) with AI-powered recommendations based on user health goals. Integrated with Stripe for secure payment processing.

## Credit Purchase System

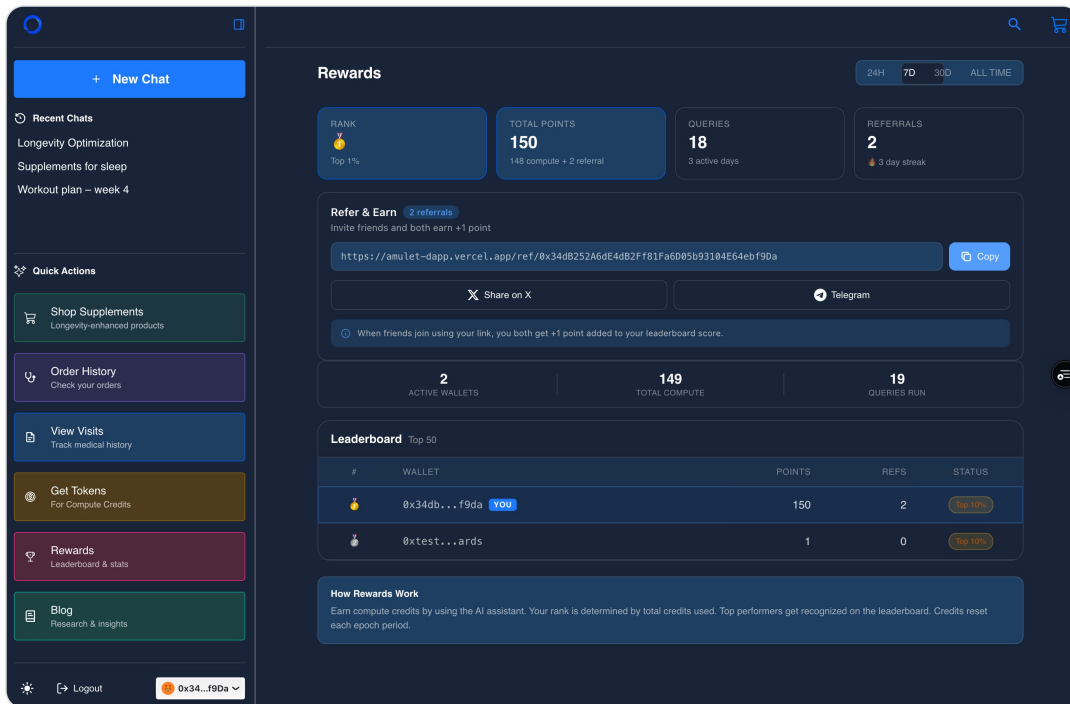

Users can purchase compute credits to access AI health consultations. Multiple credit packages available with volume discounts. Seamless Stripe checkout integration with automatic credit delivery. Credits can also be earned through staking tokens or claiming free monthly allocations.

# Doctor Visit Tracking

The screenshot displays a telehealth application interface. On the left is a sidebar with a 'New Chat' button and a list of recent chats: 'Longevity Optimization', 'Supplements for sleep', and 'Workout plan - week 4'. Below this is a 'Quick Actions' section with buttons for 'Shop Supplements' (Longevity-enhanced products), 'Order History' (Check your orders), 'View Visits' (Track medical history), 'Get Tokens' (For Compute Credits), 'Rewards' (Leaderboard & stats), and 'Blog' (Research & insights). At the bottom of the sidebar is a user profile section showing a hex color '0x34...f9Da'. The main content area is titled 'Health Questionnaire' and shows 'Section 1 of 1'. It has two progress steps: '1 Questionnaire' (active) and '2 Consent'. The questionnaire is divided into sections: 'General Health' with the prompt 'What is the reason for your visit today?' and a text input field; 'How long have you had these symptoms?' with four radio button options: 'Less than a week', '1-2 weeks', '2-4 weeks', and 'More than a month'; and 'Please list all medications you are currently taking:' with a text input field. The bottom of the screen shows a dark navigation bar with a search icon, a list icon, and a user profile icon.

Comprehensive telehealth integration allowing users to schedule, track, and review their medical visits. Full visit history with doctor notes, prescriptions, and follow-up recommendations. Integrated health questionnaires prepare patients for consultations and ensure doctors have relevant context.

## Rewards & Leaderboard

Gamified rewards system that incentivizes platform engagement. Users earn points through AI consultations, purchases, and referrals. Real-time leaderboard displays top users with achievements and tier levels. Social proof elements drive viral growth and community building.
